- Comfort +++
- Temperature Regulating

NO LIMIT · Foam & Fabric

AIR Gel Foam is the latest generation of memory foam offering a unique combination of softness and support. The humidity and temperature balancing features of AIR foam are supplemented by an infusion of cooling gel, which provides temperature regulation features - for the optimal sleeping experience.

Modal/Temperature Balance Fabric is a blend of a temperature balancing thread and a super soft and breathable modal - a cellulose fiber derived from wood. This leading edge fabric is chosen explicitly for its temperature balancing feature keeping you at a perfect temperature while sleeping. Choose it, if you want the very best.

NO LIMIT · 550 · Pillow
